Interested in delving into a STEM project or a particular topic that’s of interest to you in a study abroad context? Arcadia’s Research Programs are for you!

Arcadia STEM Summer Research programs are available in cooperation with a number of prestigious universities in Australia, England, Ireland, Scotland, and Spain. These allow you to join existing research initiatives under the mentorship and direction of world renowned scientists, in order to build your understanding of the STEM laboratory environment and academic research techniques, along with completing significant independent research.

Independent research projects in other disciplines are also available at Arcadia Centers in London, Dublin, Edinburgh, and Sydney. This is the opportunity to complete independent study and research under the guidance of an Arcadia faculty mentor.

Our expert program management and research teams ensure you’ll arrive well-prepared for life in your selected location and will soon feel at home as they invite you to delve into the history, architecture, landscape, and traditions of your new home.

Arcadia Abroad Offers:
- Academic credit
- Professional experiences and research opportunities
- Personalized support from program staff
- Activities and excursions
- An unforgettable semester or summer

Excursions & Activities

You’re not just studying abroad to spend time in class or engaged in independent research, you’re studying abroad to have an experience like no other. You’re looking for a program that feeds your adventurous and curious mind, and creates memories of diverse, unique, and life-changing experiences that will last a lifetime.

Arcadia includes lots of fun and exciting excursions, events and activities - many of which are free and included in your program.

- Organized events to integrate you into the local community
- Walking tours of unique neighborhoods
- Lectures on topics of research interest
- And more!
Arcadia Abroad Summer Research Programs

- Faculty-Supervised Independent Research Projects in Dublin, Edinburgh, London, or Sydney
- STEM Summer Research - Aberdeen
- STEM Summer Research - Brisbane
- STEM Summer Research - Glasgow
- STEM Summer Research - Granada
- STEM Summer Research - King’s College London
- STEM Summer Research - Limerick
- STEM Summer Research - London

My course curriculum is really intense, so a research option during the summer worked much better for me than a semester program would have. Once I found that I would have that opportunity as a science major, I definitely hopped on it.

— Kameron Duncan
Spelman College student,
STEM Summer Research - London
